KÜPER[®]

GK5 Snow Plough Blade

An essential piece of winter equipment that can be fixed to any snow plough, the GK5 is superior to any other cutting edge available in the UK.

The GK5 keeps your vehicles on the road for longer.

Versatile and flexible...

The GK5 cutting edge ploughs any type of road surface, from cobbles to traffic calming systems, taking them back to black without damaging cats eyes, speed ramps or iron works.

Lasts up to 20 times longer

Featuring rubber with vulcanised ceramic inlays, the GK5 cutting edge lasts up to 20 times longer than other blades so your vehicles can get on with the job at the most critical time.

Easier to replace

Designed for easy mounting reducing downtime, maximising convenience. Means your vehicles spend less time off the road and more time on it.

Reduces salt usage

Minimises the need for further salt spreading at high spread rates.

Non-damaging system

Won't remove or damage cats eyes.

Back to black

The GK5 leaves a clean surface and so reduces the excessive salting that inferior blades require to remove slush or snow residue.

Environmentally friendly

The GK5 reduces fuel consumption when compared to other blades.
