 @Safecote

Eco Ice-Melt from Safecote is a premium biodegradable solid de-icer, made from natural ingredients.

Containing premium marine salt, Safecote liquid and corrosion inhibitors it's the perfect solution for your winter needs whilst protecting the environment.

Eco Ice-Melt can remove ice and light snow, as well as preventing ice from forming and snow from settling. It is effective down to -20°C and is 60% less corrosive than de-icing salt, making it the perfect eco-friendly solid de-icer. The material can last up to 7 days after application and typical spread rates are 50% less than standard salt products, making it cost effective whilst delivering premium performance. Eco Ice-Melt is ideal for areas such as car parks, railway platforms, industrial areas, pathways & steps, driveways etc. It is easy to use and works perfectly with small spreaders or standard gritting vehicles.

Key benefits

- > Effective down to -20°C
- > 60% less corrosive than salt
- > Can last up to 7 days
- > Use 50% less material than rock salt
- > Prevents re-freezing
- > Environmentally Friendly
- > Works with your existing spreader
- > Footpaths, Driveways cleared in minutes
- > Available in 15kg bags, IBC's and bulk loads
- > One 15kg bag treats 1000m²
- > Zero fines = Zero wastage
- > Increased flowability
- > Asset protection de-icer/anti-icer
