

## Snow Shield

With the Snow Shield you can clear snow in less time with less effort.

The work load of clearing snow is transferred to the wheels of the hand truck. Designed to remove the strain caused by shovelling snow.

The Snow Shield removes snow right to the surface. No dangerous moving parts, no oil to change, no fuel to run out of, no electrical problems. Perfect for footpaths, driveways, car parks, railway platforms and similar areas with much less effort but with much greater results compared to using a snow shovel. It is easy to assemble and fits most hand trucks. Use your own hand truck, or order one with your Snow Shield. Just fit the Snow Shield to the setting most comfortable to your body height, turn the handle and tighten - you are ready to go! Just walk and push - It could not be easier!

### Key benefits

- > Fits most Hand Trucks
- > Quality Steel Construction
- > Adjustable Height
- > Stores Easily
- > Pneumatic Wheels on Hand Truck take the weight
- > No Maintenance
- > Fast, Durable, Efficient
- > Cleans Snow Right to the Surface
